

IMPORTANT PLEASE READ FIRST !

TSS - SENTINEL DRIVER INSTRUCTIONS

Please ensure that there are no other Software applications running before installing Sentinel Driver Software

Then;

Start Windows

Insert the **TSS - SENTINEL DRIVER** disk into **your floppy drive.**

Click on **Start Button**

Click on **Run**

Enter the path as A:\setup.exe and press the <PC's ENTER KEY> or click on the OK BUTTON in the run box.

Note

It will appear as though nothing has happened but it will have checked to see which version of Windows is installed then it will install the files as required for the version of Windows on the PC.

To check that it has installed click on the START button then select SETTINGS then select CONTROL PANEL click on the icon twice Add/Remove Programs then look on the Install/Uninstall list of software you should see in this list the following file;

Sentinel System Driver

Remove the floppy disk and keep safe with your Eggware disk !

This confirms it has been successfully installed, close down windows and reboot your PC then load the Eggware software.

TSS WILL NOT BE HELD RESPONSIBLE FOR ANY LOSS OF DATA !
